## RP CK bulb

### Bulb Size: 3157 SACK / SRCK

Always check your owner's manual for which lights you need. For maximum light output, choose a color that matches the color of the lens. If the lens is red or amber you will get a brighter look with a white bulb.

RP (reverses polarity) CK bulbs, only compatible with SACK / SRCK applications. On all other 3157 bulb sockets, they will blow a fuse. Non-SRCK/SACK 3157 bulbs are listed separately.

For example: 04-07 Dodge Ram trucks, 88-99 Chevy and GMC full size truck center tail lamps, 05-01 Cavalier and Sunfire, 92-98 Grand Am tail lamps. Toyota Camry, Rav 4, Corolla.

3157-SACK bulbs are for front turn signal use on Toyota Tundra

This is not a complete list, please check vehicle if unsure. If standard 3157 bulbs blow fuses, then the 3157-SRCK bulbs are those needed. 3157-SACK bulbs are for front turn signal use on Toyota Tundra

#### LED Cross Reference

3057, 3157, 3357, 3457, 4114, 4157  
(3157-SRCK / SACK Only)  
(3157 bulbs will work in all 3156 applications.)
